

Body connection / adjustment

27 January 2022 23:51

Adjustable -

Adjustable crutch mechanism

- Used be used for the leg portion of the exo. Maybe the back too

Bike/scooter adjustment mechanism

Stanley knife mechanism

Connection to body -
Velcro straps - secure body parts to exo (can wear out)

Backpack straps

Chin strap for helmets

Phone holder (But for the outside of the shoe)

Padding -
Neoprene
EPS foam used in helmet mold - absorbs impact (can break easily)

Comfort liner padding - it's for comfort. Doesn't protect the user

Can't wear 20% more than your body weight
